vTRAIL MAP

THE COMMUNITY GUIDE FOR YOUR VIRTUALIZATION JOURNEY
level up

cohesity.com/levelup
The Level Up Project

This document is created as a result of the Level Up project. Members of the technology community from all over the world have contributed to ensure that this guide will provide you with the information you need to help you make progress at the job you are trying to do at this stage of your career.

Much like a GitHub project, Level Up is a collection of contributors, but instead of creating code, we create useful assets in an “open source content” collaborative style with the sole purpose of helping the tech community.

The goal is to help people Level Up their skills so they can Level Up in their careers. Come join us in our efforts to give back to the community.

Join the Project

The vTrail Map

Get connected to the larger VMware User Community!

This guide features resources, both physical and virtual, that serve as helpful places to progress on your virtualization career journey — and ultimately discover more. Professionals in the VMware ecosystem are trying to move forward with their projects and their careers. With countless blogs, white papers, events, and podcasts, it’s not always easy to tell where the best places are to get information or to know who to reach out to with questions. This guide is intended to help get you started.

Ambassadors

Throughout the vTrail Map, you will see images of people with the “Ambassador” badge. These are members of the community who have agreed to be featured here as someone who can answer your questions regarding the topic covered in that section and help get you started. Reach out to them on Twitter if you get stuck or want help getting started.

Enjoy!
Your journey will take you in many directions. One path is through certifications, but the options are not limited to this chart. Reach out to one of the career section Ambassadors to explore all the opportunities that are out there.

Access the VMUG career videos on gotstage.com

Foundational knowledge of vSphere is required to work through any VMware track. A vSphere Install Configure Manage course, and a Data center Virtualization (DCV) track would benefit all VMware disciplines. That being said, VMware offers training for multiple career disciplines.

For traditional networking professionals new to VMware Technologies, the best curriculum is NSX training on the “Network Virtualization” tree of the certification chart, starting with the VCA exam or VCP Foundations exam.

For traditional desktop support roles, exposure to VMware End User Computing, Desktop Management or Digital Workspace curriculum and certification offerings may be better suited. These are focused on Horizon and Workspace VMware solutions.

For cloud-related disciplines, VMware offers the CMA (cloud management & automation) curriculum and certification path which is currently heavily focused on the vRealize Automation Product suite.

Brett Guarino: @Brett_Guarino
VCDX6-DCV #256, Senior VMware Certified Instructor at VMware with a focus on Cloud and Datacenter Virtualization technologies. He is a subject matter expert and content contributor for VMware Certification and VMware Center for Advanced Learning.
VMware Certification Tracks

Certification timeline:
- 2 weeks
- +30 days
- +6 months
- +18 months

For complete details on certification requirements and exam objectives, please visit vmware.com/certification or contact your local VMware Education Services representative.

Time to completion of any certification will vary based upon many factors—including, but not limited to, product experience, course completion, and time/effort.

For a list certification training courses, please visit vmware.com/certification. Click on the certification of your choice for the list of recommended courses.
The tech career journey is your career plan and the goals that you need to set for yourself. It’s your career story through the many phases of your life that gets you where you want to go.

Phoummala Schmitt: @ExchangeGoddess
Sr Cloud Advocate at Microsoft, with a background in messaging and collaboration, virtualization, and storage. She is a vExpert and co-hosts The Current Status Podcast. In her current role, she advocates for customers and the community on the power of Azure.

You own your life. Your career. You are the author of your story. Build it and good things will come. Don’t let someone own that position in your life.

The journey of your career doesn’t have to be a refined plan written on a piece of paper but it certainly helps if you have a clear set plan and some directions. Planning and defining your career goals is important because at some point in your working career you will want a raise or promotion. You WILL want more, you will want to take on more than just going to work and pushing buttons.

- **Defining your goals**, your wants for career and where you yourself in 1 year, 3 years, 5 years helps you achieve more but it also helps you know what your next steps are.
- **Seek mentors** and ask for guidance on related career paths.
- **Use your network** of career professionals, they can provide additional support.

The professional coaches will tell you to set long term goals it can be difficult to do for some given the type of industry we are in. Technology moves so fast that what you are doing now may not be relevant in a few years. Make some short goals and long-term goals.

**Determine what success means to you.** Success means different things to different people. Envision yourself in 1 year or 5 years, and ask yourself what I do I see myself doing.

- Is it working remotely?
- Leading a team?
- Specializing in a type of technology?
Write those goals down. Then start a plan on how to achieve them. Remember to create milestones that are more attainable and realistic. Be the executive producer of your story.

Ask yourself these simple questions:

- **What** – What are my goals?
- **Who** – Who else will it take to help me get there?
- **How** – How will I do it?
- **Where** – Do I need to move or change jobs?
- **When** – When does it happen?

The old saying “you don’t do it until you try it” holds very true even when speaking about careers. You may realize that specializing in something isn’t what you like and decide to change course.

**Remember to maintain balance.** As part of your career journey, you **will need** to find balance. Balance between life and work. You are no good to anyone if you are constantly stressed, overworked and on edge every day. The relationships, our families and loved ones, are affected by how we work. Working 24x7 does not help your family or your career even though we may have in our minds it will. No matter how much you tell yourself it’s for success, **IT IS NOT**.

Take time off and use your vacations. Learn new hobbies and perhaps learn something that is outside of technology. We all need sleep, some more than others, but we still need a break. Our **brains need to shut off** and take some time to recoup to be refreshed.
The Power of AWS Certification

It’s no secret that Amazon Web Services (AWS) cloud is a heavyweight contender in the public cloud space. Getting certified as an AWS Solutions Architect, Developer, or DevOps (or all 3!) can be a huge boon to your career in IT.

Chris Williams: @mistwire

Certs: AWS-PSA, VCIX6, VCAP5-DCD, VCAP5-DCA, VCP4-6, MCSE, VCP-NV

Real Job Talk Podcast: Real Job Talk is a podcast about jobs, careers and what isn’t said at the water cooler. Co-hosted by veteran recruiters and career coaches, Kat Troyer and Liz Bronson. Liz and Kat provide practical advice for navigating career changes and challenges. https://realjobtalk.com/

Host: Kat Nelson Troyer @dailykat
Organizational Development Consultant and Career Coach. Co-founder of the Influence Marketing Council and TechReckoning, 15+ years in staffing and HR in tech. Kat believes we are all the CEO of our own careers. Start with what you have and continue to learn throughout your career. Help others and give back where you can.

Host: Liz Bronson @Lizbconsult
Liz Bronson is a career coach and the owner of Liz Bronson Consulting- a recruiting company helping teams grow by finding the right people while maximizing their hiring processes by identifying the right roles and asking the right questions. Liz is passionate about authentic, candidate-centric recruiting processes that match a company’s culture.
VMware COMMUNITIES

VMUG

VMware User Group (VMUG) is an independent, global, customer-led organization created to maximize members’ use of VMware through knowledge sharing, training, collaboration, and events.

What They Do: VMUG has a global network of 150,000+ members worldwide, including 200+ local groups that connect you with peers and experts. They offer a wide variety of virtual events, 400+ local events, and 40+ UserCons and Product Roadshows.

www.vmug.com

Steve Athanas: @steveathanas
VMUG President, responsible for leading the volunteer customer board and helping members grow in the community.

VMTN

VMware Technology Network is an ecosystem of more than 100 forums where about 3 million VMware enthusiasts and customers connecting to share knowledge, resources, opinions, and experiences globally, 24/7. communities.vmware.com

Corey Romero: @vCommunityGuy
VMTN + vExpert Ambassador
VMware vExpert & VMware Community Manager.
vLadies

Our mission for vLadies is a VMUG community focused on leadership development and the empowerment of women within the VMware community. Our goal is to bring awareness and participation to local user groups giving a place to gather and talk in a friendly and supportive environment. It provides inspiration through networking and social events, builds confidence, and become visible in the community. @vLadies2018

What They Do: We are actively trying to work with local communities to promote women to get more involved with their VMUG communities. Who knows, you could be asked to tell your story on the next panel, so keep a lookout for the Women RockStars of VMUG at your local UserCon!

Lindy Collier: @indylinindy22

VMUG leader for the largest community in the world, IndyVMUG. Founder of vLadies, host of Hello From My Homelab for VMUG Advantage, vExpert class of 18, 19, with more to come! Community evangelist, an aspiring IT geek.
The vExpert program is VMware’s global evangelism and advocacy program. This program is designed to recognize community members who exemplify the best traits of sharing and service to fellow community members. VMware offers promotion of your articles, exposure at VMware’s global events, co-op advertising, traffic analysis, and early access to beta programs and VMware’s roadmap. This program is awarded to individuals, not companies, and lasts for one year. Employees of both customers and partners can receive this award. vexpert.vmware.com

Becoming a vExpert involves going above and beyond to give back to the community. Examples of activities that count toward the vExpert program are blogging, book authoring, magazine articles, CloudCred task writing, Facebook group activity, VMTN forum activity, public speaking, VMUG leadership, public videos, and more. If you feel that you are doing something which contributes to the community but it is not on the list, include it in your application! Applications are accepted twice yearly, once in November and once in June. Existing members need to apply yearly to maintain membership regardless of previous involvement.

The vExpert program includes solution specialties as well. Beyond becoming a standard vExpert there are also vExpert Cloud, vExpert vSAN, vExpert NSX, and vExpert Pro. These program subsets require independent applications from the base program and nominations from either someone within the VMware Business Unit or an existing program subset member. vExpert Pro program is a specialized group of individuals who excel in their local region at adding value to the program and giving back to the community. Recruiting, mentoring, and training community members to join the vExpert program. Think of them as vExpert Ambassadors!
Benefits include

- Exclusive Slack channel access
- Private VMTN Forum access
- Access to private Betas
- Software licenses for Home Lab
- Exclusive VMworld Party at US and EMEA VMworlds
- Exclusive webinars
- Access to vExpert logo usage
- 3rd Party NFR Licensing

Apply at the VMware Communities page and learn more about the benefits of being a vExpert. vexpert.vmware.com/apply

Engage one of the vExpert Pro ambassadors which can be found at blogs.vmware.com/vexpert/meet-the-vexpert-pro/

Aaron Bolthouse: @Bhouse563
VMware Core Solutions Engineer working with enterprise customers in the Chicagoland area. Previously a co-leader for the Wisconsin VMUG and over a decade in the IT industry as a customer before moving over to VMware. vExpert since 2015. vramblings.com

Read: The Prosperity Paradox

Clayton M. Christensen and co-author Karen Dillon reveal why so many investments in economic development fail to generate sustainable prosperity. Global poverty is one of the world’s most vexing problems and this book reveals how investment in innovative technology projects can forever change the economic trajectory of poor countries.

Karen Dillon: @KarDillon

A New York Times best-selling author and former editor of the Harvard Business Review, Karen is a 3-time co-author with Clayton Christensen, the father of disruptive innovation.

Donate your time

Mentor with: War Child

1 in every 6 children on the planet lives in a “conflict zone,” losing their access to education and personal safety. War Child helps children get back into school, and trains older children so they can, one day, provide for themselves. Find out how, with just a donation of your time and expertise, you can become a “virtual mentor” and help to break the cycle of poverty.

Yadin Porter de Leon: @porterdeleon

vExpert, founder of the Level Up Project, Silicon Valley VMUG leader, homebrewer and relentlessly curious. I get my laptops from VMware.

VMworld

From its humble beginnings in 2005, with 1,500 attendees at the first show in San Diego, this global virtualization user conference has grown to over 23,000 attendees from around the world. It starts with general sessions, then goes deeper into breakout sessions, group discussions, expert panels, Hands-On Labs, and VMware Certification opportunities, as well as one-on-one appointments with leading subject-matter experts.

No matter what path you’re on, you’ll discover the technology, learn the trends, and meet the people that are shaping the future of digital business and taking IT to the next level.

This year VMworld US is back in San Francisco at the all-new Moscone center, then back to Barcelona, so head over to VMworld 2019 and make your mark. vmworld.com

Don’t forget to visit The Square (aka VMvillage as it was named last year) in the South Hall, one level down. Check out the blogger table in the VMTN lounge, meet the #vCommunity and stock up on laptop stickers!

Reach out to this ambassador to learn more about what to do while you’re there.

Craig Waters: @cswaters1

Craig Waters is a senior product manager working for Pure Storage in Silicon Valley. He owes his career development path to contributing to the #vCommunity, “seriously!” http://craigwaters.org

VMunderground

This event has taken place the day before the US VMworld show starts for the last 13 years. VMunderground’s Opening Acts has grown into the biggest community-organized event at VMworld. It’s proven to be a great way to hear from expert panels in a less formal setting, start talking with others about what they’re doing with the technology and relax after a long day of travel. vmunderground.com
Brian Knudtson: @bknudtson

Brian has become VMunderground’s project manager and a member of the VMware community from the very first VMworld. Also, an early member of the VMTN forum, co-founding the Omaha-area VMUG, attaining vExpert status every year, and speaking at numerous VMUG and VMware events.

vBrownBag stage

In VMware village, in the social media area, you’ll find the vBrownBag stage, which hosts a fantastic series of intimate tech talks and live streams them on their website. Access the sessions via the podcast as well. vbrownbag.com

Ariel Sanchez @arielsanchezmor

Sr TAM @VMware vExpert vBrownbag host in English and Spanish. Come hang out at the vBB stage, and reach out through the most important resource in VMworld: Twitter!

vFit Run

Attention runners! Started by Eric Wright, the vFit Run has become a fitness tradition at the VMworld conference. Get your day started before the sessions by meeting early for a 3 mile run around the city. Monitor the activity on twitter #vFitRun

Eric Wright: @Discoposse

He holds the role of Technology Evangelist and has been in technology for 20 years. He specializes in VMware virtualization, OpenStack, AWS, Microsoft Azure, PowerShell, HashiCorp tools and all things leading towards automation.
Spousetivities
These great activities are designed for the spouses of those attending the conference. Crystal Lowe, wife of Scott Lowe, discovered that she was not the only one who found herself alone while her spouse was working at the VMworld conference. Since 2008, Spousetivities has organized events for spouses, significant others, families, parents, siblings, or whoever joins the conference participants. spousetivities.com

Crystal Lowe: @crystal_lowe
Founder of Spousetivities, which organizes activities for conference attendee spouses and partners.

Tim Davis from VMware kicks off the vBrownBag NSX Ninja Series with a focus on the components used by NSX to enable virtual networking.
VMware End-User Computing covers two main product sets - VMware Horizon and Workspace™ ONE™. These products provide enterprises with the ability to deliver and manage secure end-user computing solutions.

VMware Horizon is a suite of products for virtual desktop and application delivery. This platform can deliver to both on-premises data centers and in the public cloud.

VMware Workspace ONE is the simple and secure enterprise platform that delivers and manages any app on any smartphone, tablet, or laptop.
