

Strength in Numbers: How VMware Protects Orgs with Simply Stronger Security

8.4T
security events
per week¹

You can't stop
what you can't see.

Every 11 seconds, a
new organization falls
victim to ransomware.²

1.1M
ransomware
attacks stopped
in past 90 days¹

Threat actors are constantly
innovating, and so should
our defenses.

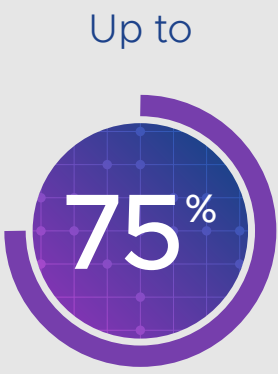

The VMware Distributed Firewall,
used for segmentation and protecting
east-west traffic, can scale to 20TB+
and delivers at one-third the cost of
other solutions in the industry.¹

~90%
reduction in
firewall rules¹

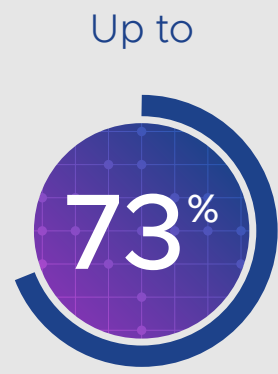

Reach a new level of simplicity
and retire rules automatically
when you retire workloads.

Without increasing complexity.

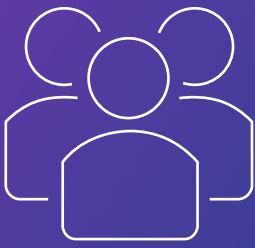

CapEx reduction
with firewall + IDS/IPS

With
Massive
Savings

OpEx reduction
with firewall + IDS/IPS

Strength in numbers.

Today, VMware supports more
than 30K customers with our
stronger security technologies.

Learn how to simplify your security
and get stronger protection today.
